

Suit measurements

Jacket Length

Measure from the upper end of the shoulder where it joins the neck to the length required (you might use one of your own jacket).

Shoulder

Measure from one edge of the shoulder to the other, across back. It is best to measure shoulders of your existing jacket.

Sleeves

Place tape where sleeve joins body of coat and measure to length desired. Measuring sleeve length of your existing coat/jacket can help.

Chest

Measure around the fullest part of the chest (do not puff up chest).

Stomach

Measure around the widest part of the Stomach.

Pants Length

Measure the length from the waist to the floor or the length you want, you should measure the length while wearing you shoes. Measuring outer length of your existing pants can help, you should measure it from the top of the waist band to the leg bottom or the length you want.

Waist

Measure the waist area where you want to wear your Jeans. Make sure the tape is snug, but not pulling tightly, and not too loose. Do NOT mention your label size, measure your waist according to the instructions above.

Seat

Seat is the widest part of your hips. Keep the measuring tape here and the area which gives the maximum measurement is the "SEAT" required.

Thighs

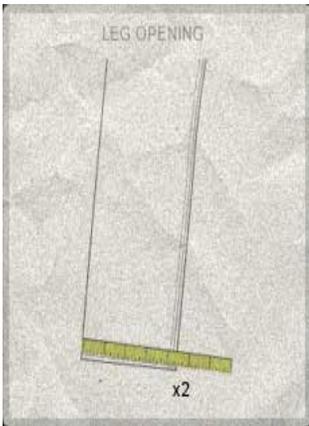

Knee

Determine the widest part of your thigh and measure according to the picture.

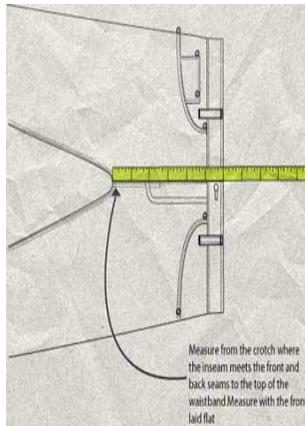

Measure around your knee cap, snug, with room for one finger.

Leg Opening

You have to give the leg opening measurements you want. Measure the leg bottom opening across the jeans, multiply this measurement by 2.

Front Rise

Measure from the crotch where the inseam meets the front and back seams to the top of the waistband. Measure with the front laid flat, pull any looseness.
